

Salyersville and Magoffin County Sewer Project

LOCATION:

Magoffin County, KY

CLIENT:

City of Salyersville and Magoffin County Fiscal Court

TYPE OF PROJECT:

Sewer Project

This is a regional project involving Magoffin County and the county seat, Salyersville. The City owns and operates the only wastewater treatment plant in the county. This joint project involved the amendment to the existing 20-Year Regional Facilities Plan and then design and construction of a new 600,000 GPD wastewater treatment plant and new collection lines that serve 432 new customers and provides improved service to the 625+ existing city customers.

The new system lifted the tap-on and line extension bans and allowed for future economic development and growth for the entire area.
