

Wetland Delineation Project

LOCATION:

Floyd County, KY

CLIENT:

Floyd County Development Authority

TYPE OF PROJECT:

Wetland

Summit Engineering, Inc. conducted a wetland delineation of 37.3 acres of land proposed for use as an industrial development.

The delineation resulted in the determination of 1.89 acres of jurisdictional wetlands which were verified by the U.S. Army Corps of Engineers (USACE). The delineation was later used during development of the property to insure compliance with Section 404 of the Clean Water Act. The proposed development was designed to fill some small wetland areas while preserving several larger wetlands and a pond.
