Carmeuse Lime Company Limestone Mine and Slurry Storage

LOCATION:
Kentucky

CLIENT:
Carmeuse Lime Company

TYPE OF PROJECT:
Limestone Mine & Slurry Storage

Summit was commissioned by Carmeuse Lime Company to complete underground surveying and mapping for volume calculations. These tasks resulted in the preparation of a detailed report identifying volume storage areas, sump locations, and volume staging plan.

Project included planimetric and topographic mapping of an existing limestone mine with bench depths of up to 50 feet. Volume calculations were performed to identify potential storage areas for disposing of flyash slurry.
